## SIMSPACE
SECURE WITH CONFIDENCE

**Building out a mature, effective cybersecurity program isn't easy to do**—especially in an evolving threat landscape driven by digital transformation and savvy threat actors. In addition, many CISOs and security teams are operating under static budgets and talent shortages.

To keep pace with constant change, it's critical to get the full value out of your cybersecurity program fast, so you can start building.

**SimSpace Professional Services helps you quickly gain maximum leverage from the SimSpace Cyber Risk Management Platform.** Whether you're using the SimSpace Platform to optimize your security stack, train your personnel or set up a live cybersecurity event, our advisory services will help you get the most out of your deployment.

## Mature your cybersecurity program

**Design**
Take a complete view of readiness and tailor training and services to your environment.

▼

**Execute**
Evaluate your people, processes and technology in a secure production simulation.
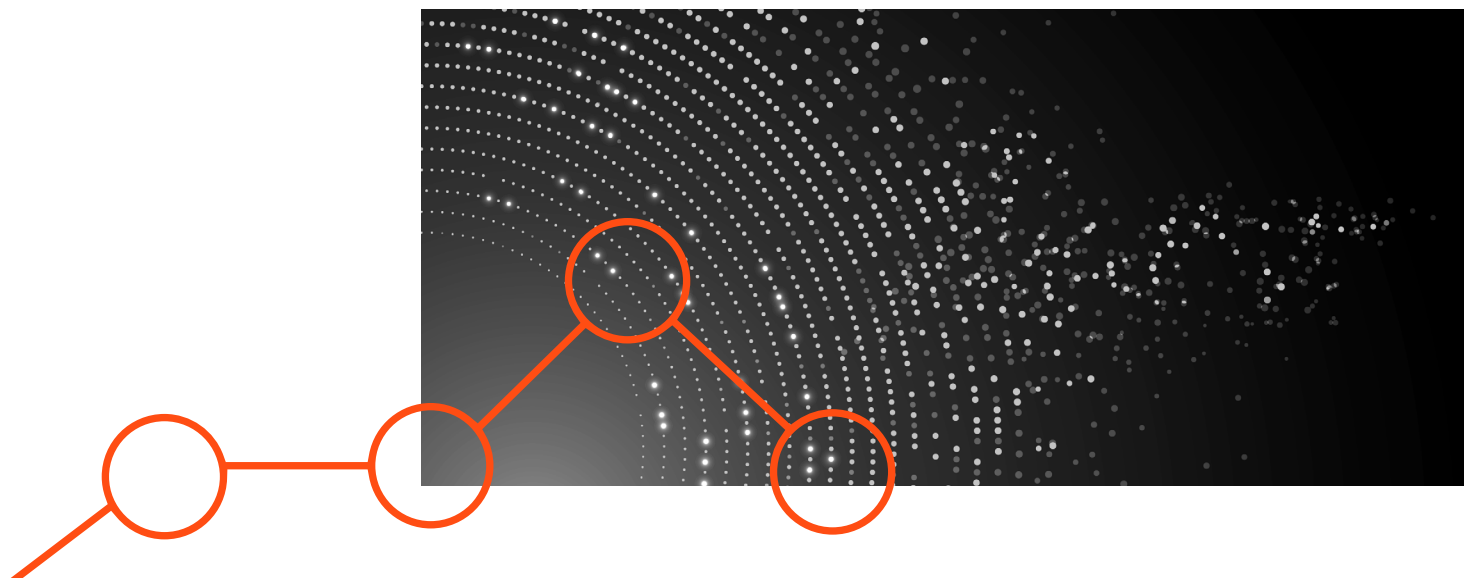

▼

**Assess**
View analytics and performance metrics from multiple sources, including after-action reports.

▼

**Advance**
Implement practices that up-level the effectiveness of your entire organization.

# assessments

# Leverage actionable expert insights

There is no one-size-fits-all approach to cybersecurity. That's why SimSpace Professional Services provides tailored advice that suits your organization's unique risk factors, regulatory requirements, operational needs and security team capabilities. We'll help you integrate any technology, training content or reporting functionality to get you to the highest level of cyber readiness.

# End-to-end cyber readiness

Every SimSpace license comes with select access to our team of platform experts who support everything from security-stack optimization and tuning to team training and range building.

### Cyber risk assessments

- Gain insight into the state of your cyber detection, defense and mitigation systems.
- Build data-driven plans to improve your security posture.
- Generate security and compliance reports for executive leadership and auditors.

### Team skills development

- Access baseline performance data to identify training, technology and process gaps, so you can maximize investments and efficiencies.
- Improve your team's ability to protect business-critical assets from adversaries with a wide variety of training and assessment tools and performance metrics.
- Enable communication and multi-disciplinary execution for incident response and threat-hunting activities.

**Trusted across industries**

*SimSpace Professional Services has built high-fidelity, internet-scale, hyper-realistic cyber ranges for some of the world's largest banks, insurance providers, government organizations and more.*

the
**highest level**
of cyber
readiness

integrations

### Range event services

- Choose from an array of cyber range event services, starting with range-only support and extending to comprehensive event design, execution and assessment.
- Conduct capture the flag or cyber defense challenge exercises to develop skills and promote constructive competition.
- Create hands-on activities for your tradeshows to highlight your solution's capabilities through participant experience.
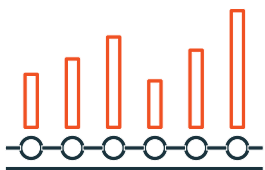

### Professional Services training

- Maximize the value of your SimSpace investment with the help of our experienced staff.
- Quickly build proficiency with both platform-native and customized training paths, range deployments and attack content.
- Create a repeatable process that drives participation, accelerates gains and provides actionable insights.

*Maintain your (ISC)² certifications*
*You and your team can earn CPE credits by completing training courses on our cyber range platform, or by attending SimSpace virtual events.*

## Benchmark team performance

By becoming certified to perform SimSpace Assessments, you'll be able to evaluate security team performance the same way SimSpace does. This allows you or your customers to compare assessment results with our expansive industry data set and apply a common standard to security program bench-marking.

## Partner with SimSpace to build training exercises, attack simulations and cyber games for your next event

SimSpace has years of experience creating realistic cyber events with major trade shows, cyber teams, universities and hackathon sponsors.

# Why SimSpace?

Our exclusive cyber range provides an unparalleled platform for security assessments, stack optimization, real-world attack simulations, and extensive individual and team readiness training. SimSpace helps you uplevel your security posture and team competency, so you are ready to face the current threat environment. As a result, you'll be able to meet operational goals, drive revenue growth, and stay competitive and compliant.

| ▶ World's **most advanced** cyber range | ▶ Trusted by 5 of the **Top 10 US banks** | ▶ Chosen by the **US Cyber Command** |
|---|---|---|
| ▶ **40% reduction** in configuration related breaches | ▶ **45% improvement** in attack defense | ▶ **48% improvement** in time to detect attacks |
